With the exception of a few scattered instances, there was all the more I can say
this year.

There was a very good crop of wheat, but the quality was not so good as in
previous years. The yield was about 15 bushels per acre. The straw was very
heavy and the grain was very hard.

The weather was very dry and hot during the summer months. The ground
was very hard and the crops were very dry. The yield was about 15 bushels
per acre.

I have leaves rooting of all varieties on my spring list, except a very few that I'm out of at present. I have plants of only a few varieties though. Better ask before ordering.

READ CAREFULLY BEFORE ORDERING

I will replace leaves or plants that do not reach you in good condition, if notified immediately. If you lose some of the leaves through propagation (not my fault) I will be glad to replace them free with future orders.

Rooted leaves will have small plants started, whenever possible. Where leaves are slow in sending little plants, or where the supply is short, I may have to send just well rooted leaves or substitute another variety. I will not substitute unless absolutely necessary. If you do not want a substitute tell me and I will return your money.

On orders under \$3.50 please add 50¢ to help pay postage and packing costs.

I will start shipping about September 15th. I send all orders "Special Handling" unless you request otherwise. Air Mail and Special Delivery are extra on all orders.

My plants are state inspected and declared free of diseases and insects. Come and see them when you are in Sheridan. Please call first. My phone number is 2010 J.
